Nuclear Smuggling Outreach Initiative:
Results to Date and Highest Priority Projects Needing Funding

Steps in Engagement Process

1. Identify countries of greatest concern
2. Conduct comprehensive assessment of anti-smuggling capabilities
3. Develop joint action plan/list of priority assistance projects
4. Recipient country: implement steps it can take on its own; U.S.: seek donors for priority assistance projects
Summary of Results to Date

- Eight countries engaged
  - UKR, KAZ, GE, KR, ARM, TAJ, AFG, AZER
- Joint action plans in force with first five
- Eleven donor partners secured
  - CAN, FR, JAP, NZ, NOR, ROK, SWE, UK
- Thirty-one projects at least partially funded
  - EU, IAEA, UNODC
Reasons to Contribute to NSOI-Developed Projects

- Addresses a critical global threat
- Implements G-8 Global Partnership commitments/Global Initiative principle of assistance
- Involves relatively small costs – few hundred thousand to few million dollars per project
- Diversifies assistance beyond Russia
- Focuses on projects already approved by recipient governments
- Does not require new bilateral agreements with recipient governments
Radioactive Source Security

- **Purpose:** To remove vulnerable radioactive sources from circulation if they are no longer in use and to enhance security for those sources still in use.

- **Project activities may include:**
  - Packaging and transporting disused radioactive sources to long-term storage facilities.
  - Searching for and securing orphaned radioactive sources.
  - Upgrading physical security measures at facilities with vulnerable, high-activity radioactive sources.

- **Countries:** Armenia, Kazakhstan, Kyrgyzstan
Nuclear Regulatory Development in Kazakhstan

- **Purpose:** To develop further Kazakhstan’s radioactive source registry and regulatory infrastructure.

- **Project activities include:**
  - Equipping the Ministry of Health to work with the Kazakhstan Atomic Energy Committee to maintain the radioactive source registry and to conduct regular inspections.
  - Conducting training of personnel on modern methods of carrying out inspections.
Border Security – POEs

- Purpose: To improve monitoring at airports, seaports, and land border crossings.

- Project activities may include:
  - Providing radiation portal monitors, related communications equipment, central alarm stations, and handheld radiation detectors for secondary inspections.
  - Training for border enforcement officials on use and maintenance of the equipment.

- Countries: Kazakhstan, Kyrgyzstan, Ukraine
Purpose: To improve patrolling and monitoring of green borders—areas between established border crossings.
- Threat at green borders increases as POE security improves.

Project activities may include:
- Providing modular structures to serve as a base of operations to patrol the surrounding region.
- Providing vehicles, portable radiation detection equipment, communications equipment, remote sensing equipment, etc.
- Training border enforcement officials on how to incorporate new equipment into patrol posture.

Countries: Armenia, Georgia, Kazakhstan, and Ukraine
Maritime Security for Georgia

- Purpose: To restore and further enhance the Georgian Coast Guard’s (GCG) capabilities to monitor the Black Sea.

- Project activities include:
  - Providing funding for additional patrol vessels.
  - Repairing and refurbishing existing vessels and supporting maintenance and operations costs, if needed.
  - Providing additional communications equipment.
  - Providing funding to replace assets and equipment (spare parts, computers, desks) lost in August 2008.
  - Continuing training on maritime law enforcement, Coast Guard operations, and English language.
Secure Communications for First Responders in Georgia

- Purpose: To provide Georgian law enforcement and border security personnel with compatible, secure communications equipment.

- Project activities include:
  - Providing the Ministry of Internal Affairs, Border Police, Customs Service, Nuclear and Radioactive Safety Service, and other agencies with portable radios that can provide reliable, robust, secure, and compatible communications.
  - Providing relay towers or other infrastructure upgrades as needed.
  - Helping to establish improved coordination among law enforcement and border security personnel.
Purpose: To decrease opportunities for corruption among personnel combating nuclear smuggling and to reduce the influence of corruption on anti-smuggling assistance programs.

Project activities may include:
- Training.
- Developing standardized risk models for determining what is searched at borders.
- Supporting technical accountability measures at borders such as cameras and radiation monitors that report to central alarm stations.

Countries: Armenia, Kazakhstan, Kyrgyzstan, Ukraine
