International Symposium on Sustainable Improvement of Animal Production and Health

8–11 June 2009
Vienna, Austria

CN-174

<http://www.iaea.org/meetings>

Joint FAO/IAEA Programme
Nuclear Techniques in Food and Agriculture

Vision

Sustainable improvement of animal production with reference to the development and implementation of nuclear and nuclear related technologies that enhance food security and alleviate poverty.

Objectives

The Symposium will address:

- The early and rapid diagnosis and control methods for transboundary animal diseases including those of a zoonotic nature;
- Improved reproduction technologies and breeding strategies;
- The efficient and sustainable use of locally available resources for animal production.

Audience

- Scientists and research managers;
- Policy makers – governmental/non-governmental/international organizations;
- Donor agencies – international/national organizations, international/national foundations and trusts.

Programme structure

To achieve the objective of the Symposium, each session will comprise:

- A keynote address;
- Plenary presentations;
- Presentations that supplement specific areas within the session topic;
- Posters and detailed technical papers that present the state of the art in the topic;
- Discussions.

Topics

Topics to be addressed at the Symposium include:

- Detection and control of transboundary animal diseases, including zoonoses;
- Animal nutrition and optimized utilization of locally available resources;
- Animal reproduction and breeding strategies;
- Climatic and environmental stress on livestock production;
- Interactions between nutrition, reproduction and genotype;
- Animal product safety and food quality;
- Food security and policies.

Exhibition of equipment and services

Limited space will be available for commercial vendors' displays and exhibits at the venue. Interested parties should contact:
Conference Services Section
Fax: +43 1 26007
Email: official.mail@iaea.org

Registration

There is no registration fee. Please see the conference web page for on-line registration, participation forms and details for the submission of papers.

Key deadlines

15 November 2008

- Submission of extended synopsis (electronic version);
- Paper Submission Form (Form B);
- Grant Application Form (Form C).

31 March 2009

- Submission of full paper;
- Registration (Form A).

Language

The conference will be held in English.
