

Exhibition opportunities during the International Conference on Human and Organizational Aspects of Assuring Nuclear Safety —Exploring 30 Years of Safety Culture

The International Atomic Energy Agency (IAEA) is organizing an **International Conference on Human and Organizational Aspects of Assuring Nuclear Safety —Exploring 30 Years of Safety Culture** to be held at the IAEA's Headquarters in Vienna (Austria) from **22 to 26 February 2016**. Approximately 400 participants from IAEA Member States and international organizations are expected to attend the conference. In order to provide an opportunity for the nuclear community to reflect on the pivotal role that human and organizational aspects play in assuring nuclear safety, to review the experiences gained with regard to human and organizational factors (HOF), safety culture and leadership for safety, the IAEA is planning to establish an exhibition space for vendors in the field of HOF, safety culture and leadership for safety in conjunction with the conference. The conference and the exhibition will take place at the Vienna International Centre.

The IAEA does not charge an exhibitor fee; however, companies wishing to take advantage of the opportunity to exhibit are encouraged to make a voluntary contribution to the IAEA in support of the conference. The contribution would be utilized to financially support some scientists from developing countries attending the conference, or other costs directly related to the organization of the meeting. Voluntary contributions will be acknowledged during the conference.

In view of physical space limitations, companies will be served on a **'first come first served'** basis. To allow for timely preparation, all pledges to participation should be made before **20 July 2015**.

Please note that should exhibitors wish to be registered as meeting participants, they must follow the normal participation procedures as described under the conference announcement available here:

<http://www-pub.iaea.org/iaeameetings/50800/-International-Conference-on-Human-Dynamics-Assuring-Nuclear-Safety-Exploring-30-Years-of-Safety-Culture>

Further details on logistical arrangements (space, dates) for the exhibition will be sent to exhibitors after their pledges have been received.

Since a limited amount of space will be available for commercial vendor's displays/exhibits during the conference, interested parties should contact safetyculture2016@iaea.org.
