INIS: AUTHORITY LIST FOR JOURNAL TITLES

**INTERNATIONAL ATOMIC ENERGY AGENCY
VIENNA, APRIL 2007**

INIS publishes two reference series: the *INIS Reference Series* and the *ETDE/INIS Joint Reference Series*.

The *INIS Reference Series* comprises the rules, standards, formats, codes, authority lists, etc., on which the system is based. It currently consists of 10 manuals published by the IAEA from 1969 to 2007. Some of the manuals have been revised, and further revisions will be issued in 2007.

The *INIS Reference Series* is complemented by the *ETDE/INIS Joint Reference Series*, which includes standards developed jointly with the Energy Technology Data Exchange. It currently consists of 3 manuals first published in 2002 by the IAEA.

Individual manuals in the *INIS Reference Series* and in the *ETDE/INIS Joint Reference Series* may be purchased at the prices indicated at the back of this manual. Some publications are no longer available in printed form. For further information, please consult the INIS web site at: <http://www.iaea.org/inisnkm>.

Organizations participating in INIS may obtain reasonable quantities of copies of manuals in the *INIS Reference Series* and the *ETDE/INIS Joint Reference Series* on application to:

PREFACE

This is the 33rd revision of the *INIS: Authority List for Journal Titles (IAEA-INIS-11)*. This list is published annually and includes the titles of all journals which have contained articles submitted to INIS at the time of publication. The current list contains 13 396 journal titles, 2 170 regularly scanned journals and 578 key journals. It was last updated in February 2007.

A journal — or periodical — is a continuing publication issued in a succession of discrete parts, usually bearing numbering and/or chronological designations and intended to be continued indefinitely. It is generally published within a defined, fixed interval between issues and normally appears more than once per year. It includes a mixture of articles, letters, summaries, etc. Within this definition, annuals such as the *Annual Review of Nuclear Science* are included, but series titles such as the *McGraw-Hill Series in Nuclear Engineering* are not.

IDENTIFICATION FIELDS AND CODES

The purpose of this document is to provide descriptive cataloguers with standard elements to include in bibliographic level 'S' of the INIS record. These elements include field (tag) 229 (Full Journal Title), 320 (ISSN¹) and 321 (CODEN)². The full journal title is mandatory, and either the ISSN or the CODEN must be included (both may appear). Instructions on how to use this and other elements of the INIS record format are found in *INIS: Guide to Bibliographic Description (IAEA-INIS-1)*.

ARRANGEMENT

In order to help the user find titles easily, the list is arranged in six parts, followed by summary statistics:

- In *Part I*, all key journals are grouped under the name of the country or international organization responsible for their input in INIS, then sorted alphabetically under their title.
- In *Part II*, all key journals are sorted alphabetically under their title. The name of the country or international organization responsible for their input in INIS is entered in parentheses within the body of the entry.
- In *Part III*, all journals that are regularly scanned by the national INIS Centres are grouped under the name of the country or international organization responsible for their input in INIS, then sorted alphabetically under their title.
- In *Part IV*, all journals that are regularly scanned by the national INIS Centres are sorted alphabetically under their title. The name of the country or international organization responsible for their input in INIS is entered in parentheses within the body of the entry.
- In *Part V*, all journals are grouped under the name of the country or international organization responsible for their input in INIS, then sorted alphabetically under their title.
- In *Part VI*, all journals are sorted alphabetically under their title. The name of the country or international organization responsible for their input in INIS is entered in parentheses within the body of the entry.
- Appendix A — Statistics

JOURNALS REGULARLY SCANNED AND KEY JOURNALS

In *Part V* and *Part VI*, the journal titles marked with a bullet '•' sign in the margin on their left are regularly scanned by the national INIS Centres. In addition, those titles that have been identified as 'Key Journals' by the national INIS Centres are marked with a section sign '§', also on their left.

ADDITIONAL COPIES

Additional copies may be obtained from the INIS Secretariat, and the national INIS Centres can download an electronic version of this entire document, as well as copies of each individual part from the Members Area of the INIS web site at <http://www.iaea.org/inisnkm/marea/member1.htm>. A separate list of the *2007 Journals Regularly Scanned* and the *2007 Key Journals* has also been distributed to all INIS Liaison Officers as an attachment to *INIS Information Letter* No. 243 dated 2007-02-15.

¹ The ISSN (International Standard Serial Number) is administered by the ISSN International Centre in Paris, France.

² The CODEN is assigned by Chemical Abstracts Service, Columbus, Ohio, USA.

NEW JOURNAL TITLES

If input is submitted from a journal that does not appear in the authority list, it is necessary to provide the INIS Secretariat with a copy of the cover page, title page and/or any other editorial pages that show the journal's title and the publishing information, including the ISSN if present. This information is used to update the list. Three quarterly cumulative supplements are distributed to all INIS Liaison Officers in addition to the annual update.

The INIS Secretariat wishes to thank the national INIS Centres for their contribution to INIS and the maintenance of the Authority List for Journal Titles. Correspondence concerning additions and corrections, as well as any comments and suggestions for improvements to this document should be addressed to:
