

International Atomic Energy Agency Special Event at the General Conference 2006 New Framework for the Utilization of Nuclear Energy in the 21st Century: Assurances of Supply and Non-Proliferation

19–21 September 2006
Conference Room C, Austria Center Vienna

By providing reliable assurance of supply of reactors and fuel at competitive market prices, we remove the incentive for countries to develop indigenous fuel cycle capabilities and also address concerns about their dissemination. This should be followed by new frameworks for multilateral management and control of the sensitive parts of the nuclear fuel cycle (i.e. enrichment and reprocessing).

IAEA Director General Dr. Mohamed ElBaradei

- Session 1:** Possible Frameworks for Nuclear Energy Security: Assurances of Supply
- Session 2:** Possible Frameworks for Assurances of Supply: Institutional, Technical and Legal Aspects
- Session 3:** Conclusions, Findings and Future Directions
