

FR09 Young Generation Event

**International Conference on Fast Reactors and
Related Fuel Cycles (FR09), Kyoto, Japan
9 December 2009**

Kwi Lim Lee

**Korea Atomic Energy
Research Institute**

YGE

1. What international cooperation is desirable with regard to fast reactor technology development and deployment to meet global nuclear energy sustainability requirements?
 - Substantive international cooperation : Technical know-how interchanges rather than informal meetings
 - If there is **synergy** among countries, fast reactor technology will be more successful.
 - An increase of young man power : Making an effort for knowledge preservation & knowledge transfer

YGE

2. What role do you expect for IAEA in the international cooperation with regard to fast reactor technology development and deployment?

- The IAEA should become the center to strengthen the international cooperation.
- The IAEA helps countries being in peaceful uses of fast reactor technology.
- The IAEA has to prepare against a shortage of young man power in such great demand.

YGE

3. What international cooperation do you expect for the world's young generation?

Build a network!

➤ On-line activities to communicate opinions with other country's young generations.

Think positively about your challenges to a nuclear energy!

Study hard for the future!

➤ Fast reactor technology will be an important part for the future energy supply.
