

**European Nuclear Society
Young Generation Network**

Report on ENS YGN position

**Development and deployment of fast reactor technology to
meet global nuclear energy sustainability requirements: a
challenge for the young generation**

**IAEA FR09, Kyoto Conference Center
Kyoto**

9th December 2009

International cooperation, role of IAEA and Young Generation Networks

- International cooperation with industry and state players is essential to demonstrate the economical viability of the technology and avoid “double funding”
- IAEA can help manage knowledge transfer and can also help funding basic R&D to maintain competence.
- YGN have a decisive role to create a community feeling and open perspectives to young scientists: dedicated YGN conferences, workshops, technical and cultural trips etc.
