KEY DEADLINES
31 May 2014 Submission of Grant Application Form (Form C)
31 May 2014 Submission of Form for Submission of a Paper (Form B) and abstract
6 July 2014 Notification of acceptance of papers
20 October 2014 Submission of accepted full paper (8 pages max.)

CONFERENCE LANGUAGE
The conference will be held in English.

CONTACT INFORMATION

Symposium Address
International Atomic Energy Agency
Vienna International Centre
PO Box 100
1400 Vienna, Austria
Telephone No.: (+43) 1 2600 0
Fax No.: (+43) 1 2600 7
Email: safeguards2014@iaea.org

Symposium Web Site
Includes detailed information on administrative procedures, including participation, submission of papers, registration and grants.
http://www-pub.iaea.org/iaeameetings/2014

Scientific Secretary
Mr. Andrew Hamilton
Scientific Secretary
Division of Concepts and Planning
Telephone No.: (+43) 1 2600 21989
Email: A.Hamilton@iaea.org

Ms. Stephanie Poirier
Assistant Scientific Secretary and Exhibit Coordinator
Division of Concepts and Planning
Telephone No.: (+43) 1 2600 26169
Email: S.Poirier@iaea.org

Administration and Organization
Ms. Martina Neuhold
Conference Services Section
Division of Conference and Document Services
Telephone No.: (+43) 1 2600 21314
Fax No.: (+43) 1 2600 7
Email: M.Neuhold@iaea.org

Symposium on International Safeguards Linking Strategy, Implementation and People
20–24 October 2014

Organized by the
International Atomic Energy Agency
in cooperation with
INMM, ESARDA
INTRODUCTION
Since the 2010 Safeguards Symposium, the IAEA’s Department of Safeguards has published its Long-Term Research and Development Plan, 2012–2023. The objective of the 2014 Symposium is to foster dialogue, exchange information and promote cooperation with IAEA stakeholders using this R&D plan to make progress towards achieving the Department’s strategic objectives.

STRUCTURE
Continuing from the R&D Plan, the symposium will hold forward looking safeguard sessions with oral and poster presentations, discussions and exhibitions. It will be held over five days at the Vienna International Centre — the IAEA’s headquarters.

TOPICS

CONCEPTS AND APPROACHES
• Strategic planning;
• Keeping abreast and making use of scientific and technological innovation;
• Further evolving safeguards implementation;
• Developing approaches to fully utilize State and regional authority data;
• Expanding implementation and development support.

COOPERATION WITH STATES
• Strengthening State and regional systems of accounting and control;
• Enhancing IAEA and State cooperation;
• Promoting the interface between nuclear safety, security and safeguards.

DETECTION OF UNDECLARED NUCLEAR MATERIAL AND ACTIVITIES
• Identifying appropriate signatures and indicators;
• Increasing the ability to detect undeclared nuclear material and activities;
• Developing instruments and associated techniques to detect the establishment and operation of nuclear fuel cycle activities.

SAFEGUARDS EQUIPMENT AND COMMUNICATION
• Developing and deploying improved tools for measurements of nuclear material at enrichment and reprocessing plants;
• Developing and deploying tools and techniques to enable timely detection of HEU production in LEU enrichment facilities;
• Developing more sensitive and less intrusive alternatives to existing NDA instruments;
• Deploying secure and authenticated communications for safeguards equipment;
• Developing secure and authenticated techniques to enable the use of operator systems.

INFORMATION TECHNOLOGY, COLLECTION, ANALYSIS AND SECURITY
• Using safeguards information in a fully integrated and secure environment;
• Developing software tools for use by State and regional authorities in creating and submitting accountancy reports and additional protocol declarations;
• Integrating information sources to detect inconsistencies;
• Recovering from an IT failure.

ANALYTICAL SERVICES
• Expanding the use of the Network of Analytical Laboratories;
• Developing elemental and isotopic signatures of fuel cycle activities and their application to environmental sampling and nuclear material analysis;
• Developing techniques, methods and equipment to detect signatures of nuclear activities in environmental samples;
• Improving capabilities to characterize nuclear material and to determine its origin.

SAFEGUARDING FUTURE NUCLEAR FUEL CYCLES
• Safeguarding advanced nuclear facilities and innovative fuel cycles;
• Encouraging proliferation resistance and safeguards by design;
• Conducting further nuclear verification missions.

TRAINING
• Developing and maintaining the expertise of safeguards professionals;
• Developing training to reflect new facilities and technologies;
• Deploying new training tools using advanced methods, such as virtual reality, immersive learning and web based training.

EXHIBITS
Equipment and services, including commercially available products will be exhibited during the symposium. Enquires should be addressed to the exhibit coordinator.
