Guidance Notes on IAEA’s Supplier Payment Policy and the Submission of Bank Information

Any person or organization the IAEA pays is classed as a supplier. Payments to suppliers are governed by the IAEA’s payment policy. Put simply, this policy requires that the IAEA only pay the person or organization with whom it has an agreement.

This means that the IAEA will not pay a person when its agreement is with an organization. Nor will it pay an organization when the agreement is with a person.

Moreover, the IAEA will not pay third parties. In other words, it will not pay a different organization or person from the one with whom it has an agreement.

Hence, bank account information submitted to the IAEA must carry the name of the person or organization with whom the IAEA has an agreement. A person may submit a joint bank account (e.g. one shared by a husband and wife) as long as their own name appears in the account name.

Exceptions to the above rules are allowed in certain circumstances:

A. If an organization is owned by a “parent” organization, the IAEA may pay the “parent” organization.

B. The IAEA may pay a department of an institute whose name differs from that of the institute itself.

C. If specifically designated, an employee of a research institution may receive the payment on behalf of his/her employer.

D. If specifically designated, the Finance Officer of an institute may collect cash from UNDP to distribute to participants.

E. Employers may be compensated for their employees’ attendance at a meeting. (Note: this exception will not apply if the attendee is an owner or partner of the company.)

F. If a person’s name has been legally changed, the IAEA may pay an account bearing the new name.

A full explanation of these exceptions appears overleaf. It gives some typical examples to illustrate the policy, including examples of what will not be accepted.

Suppliers should provide bank information using the attached IAEA Bank Information Form, which they should have received from their IAEA contact along with these instructions. This form should be completed electronically, and as fully as possible. The form is designed to cover as many different situations as possible, and it carries a full set of notes on its reverse to aid completion. If a piece of information is not available, the relevant section should be left blank, as not all fields are used for all bank account types. For example, the IBAN field is not used for accounts outside IBAN countries and the ABA code is left blank for non-USA accounts. Please note that some of the information is being requested to help make sure that in the IAEA’s systems the bank details will be attached to (i.e. associated with) the person or organization with whom the IAEA has an agreement.
