23rd WiN Global Annual Conference

Women in Nuclear

meet

Atoms for Peace

24–28 August 2015
Vienna, Austria

Organized by WiN Global and WiN IAEA

In cooperation with the

IAEA

International Atomic Energy Agency

BACKGROUND

Women in Nuclear (WiN) Global is a worldwide non-profit-making network made up mostly of female professionals working in the various fields of nuclear energy and radiation applications. WiN Global aims to promote understanding and public awareness of the benefits of nuclear and radiation applications supported by a series of active networks, both national and international. It has approximately 25 000 members from more than 100 countries, organized in national, regional and international chapters. Every year, a chapter of WiN Global organizes the annual conference, which is a unique occasion for the WiN Global community to meet.

The 23rd WiN Global Annual Conference will be held in Vienna and organized by the IAEA WiN Chapter, in cooperation with the IAEA. The conference will highlight the vital role women play in all applications of nuclear science and technology.

OBJECTIVES

The objectives of the conference are to:

- Exchange information on the latest developments, trends and challenges in the nuclear field;
- Provide opportunities for WiN Global members and chapters to share experience;
- Communicate and raise public awareness of the benefits of nuclear science and technology, the work of WiN Global, its chapters and of the IAEA;
- Foster interest among women in pursuing careers in nuclear-related fields; and
- Encourage well-qualified women to apply for IAEA positions.

LIST OF TOPICS

Panels will cover the following topics:

- Career development of women in nuclear-related fields and communication
- Nuclear applications
- Nuclear energy, environment and climate change
- Safeguards and non-proliferation.

AUDIENCE

The target audience comprises experts (including those who have just embarked on their careers), in particular women, working in all applications of nuclear science and technology.
