

Poster Preparation and Display: Guidelines

These guidelines are relevant to authors who have had an officially designated synopsis to the conference accepted by the Programme Committee.

For the respective timing of the poster presentation please see the conference programme available at the conference web site:

<http://www-pub.iaea.org/iaeameetings/50801/International-Conference-D-and-E-R>

Preparation of Posters

The poster should be a visual presentation of your submitted extended synopsis. Posters should meet the following criteria:

Poster Size

All posters should be in portrait format and size:

A0 (1189 mm high and 841 mm wide).

Lettering

The poster should be easily readable at a distance of two metres. Use UPPER and lower case for general content, as all-capital text is difficult to read. Avoid using mixtures of type/font styles. Left justify text, as it is easier on the eyes of the reader.

Graphs/Photographs

For visual effect, it is recommended that graphs be no smaller than 120 mm × 180 mm.

Display/Presentation of Posters

Posters will be displayed for the entire duration of the conference. They will be ordered by Session. At the conference please find the poster board bearing your paper number and affix your poster to it. Should you require assistance, please see the conference desk.

Authors are requested to be present at their posters for discussion with interested participants ***during the coffee break of the conference session at which their poster is scheduled.***
