

Exhibition Opportunities during the International Conference on Applications of Radiation Science and Technology (ICARST-2017)

The International Atomic Energy Agency (IAEA) is organizing the First International Conference on Applications of Radiation Science and Technology, in Vienna, Austria from 24-28 April 2017. Over 350 participants ranging from IAEA Member States, international organizations, scientific & research institutions, commercial companies, industry leaders, non-governmental organization, UN organizations are expected to attend this conference. The participants will represent more than 60 nationalities. **We would like to solicit interest from prospective participants who wish to exhibit during this conference.**

The Conference will highlight the latest key developments in the applications of radiation science and technology as well as the 'state of the science' in this field. It will also incorporate and promote national, regional and global initiatives for implementing proven industrial radiation applications that lead to socio-economic benefits and strengthen capacity building in Member States, serving as a composite platform through which industry and academia can foster new initiatives for ensuring the success of radiation technologies in meeting the emerging challenges in various areas. A comprehensive list of topics covered in the Conference can be found in the Conference announcement.

Each company will have, free of charge, an exhibition space of 6m² (3x2m) including one table (80x160cm) and 2 chairs. Alternatively, professional booths with walls can be rented from an outside company.

Companies wishing to take advantage of this opportunity to exhibit are encouraged to make a voluntary contribution to the IAEA in support of the conference. The contribution will be used for the costs directly related to the organization of the conference. An acknowledgement of the voluntary contribution would be made in the distributed conference programme booklet given to participants upon registration.

In view of space limitations, the selection of exhibitors will be based on a 'first come first served' basis. Therefore, interested parties should contact the Scientific Secretariat by e-mail (ICARST-2017.Contact-Point@iaea.org) before **14th October 2016**.

Further details on logistical arrangements for the exhibition will be sent to the exhibitors after their pledges have been received.
