

An Undergraduate Ion Beam Analysis Laboratory

**Graham F. Peaslee
Paul A. DeYoung**

May 5, 2009

Outline

- **Motivation**
- **Hope College Approach**
 - RNB studies
 - Ion Beam Analysis Laboratory
- **Representative science:**
 - Lake sediment chemistry
 - Metalloprotein biochemistry
 - Luminescence & forensic geology
- **Conclusions**

The Need for Change in the US?

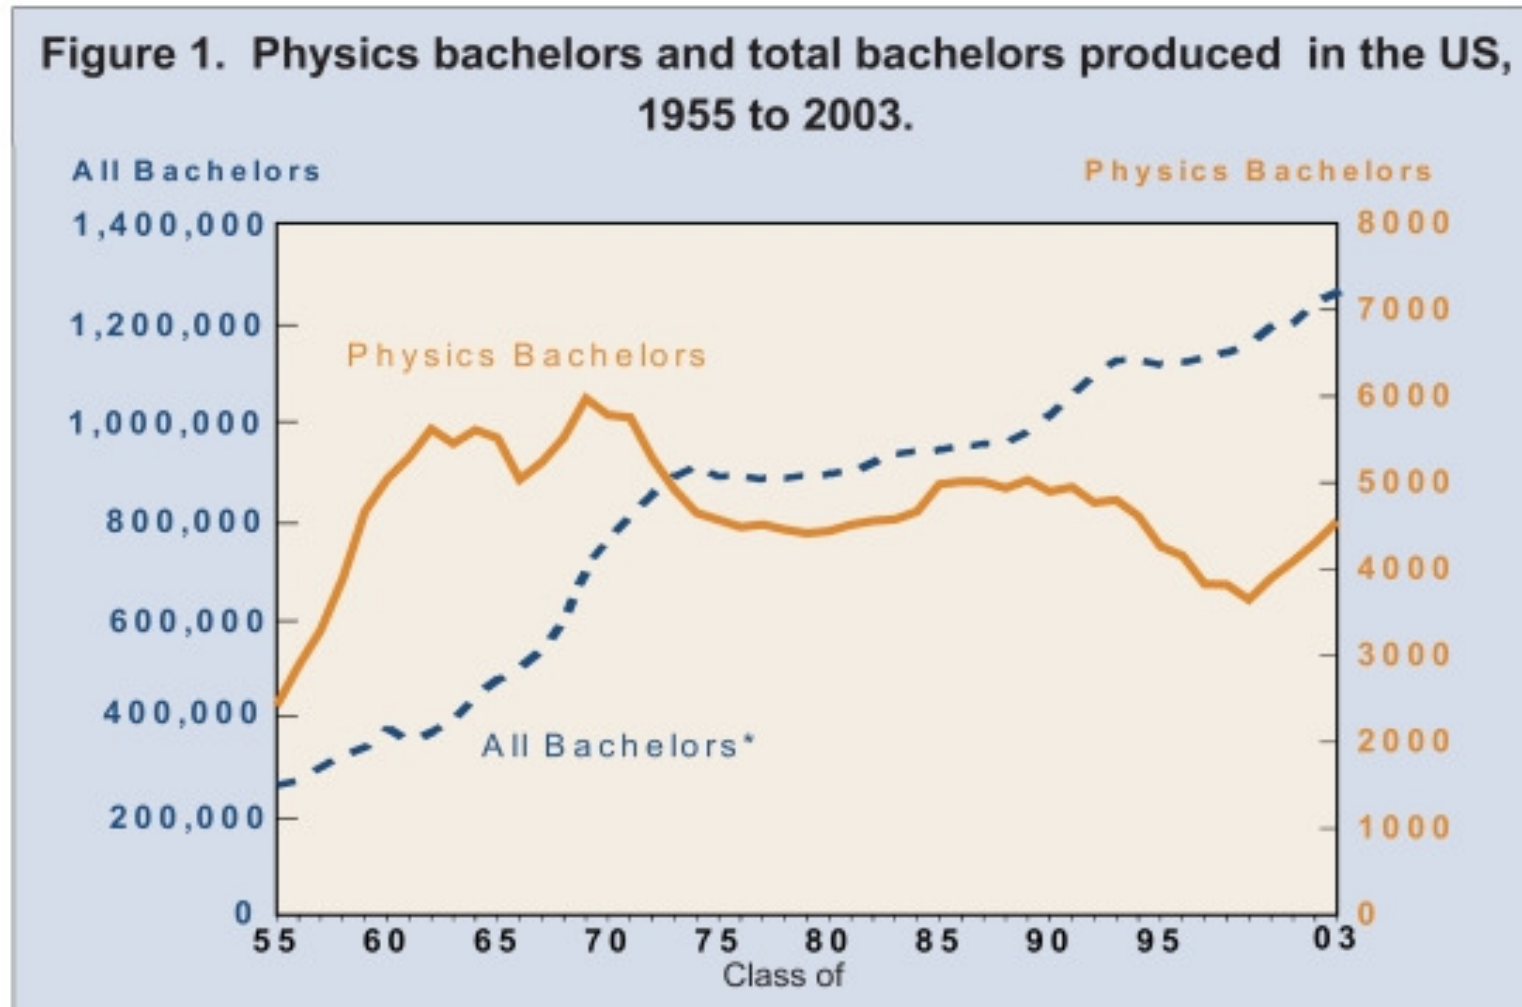

- **Traditional Undergraduate Approach:**

Lectures (and labs)

This approach is limited/threatened by:

- (a) Changing demographics**
- (b) Changing student interests**
- (c) Years since discovery...**

There hasn't been a sputnik recently...

- **SOURCE: AIP Statistical Research**

International Perspective?

- **Same observations for the “traditional” undergraduate educational approach**

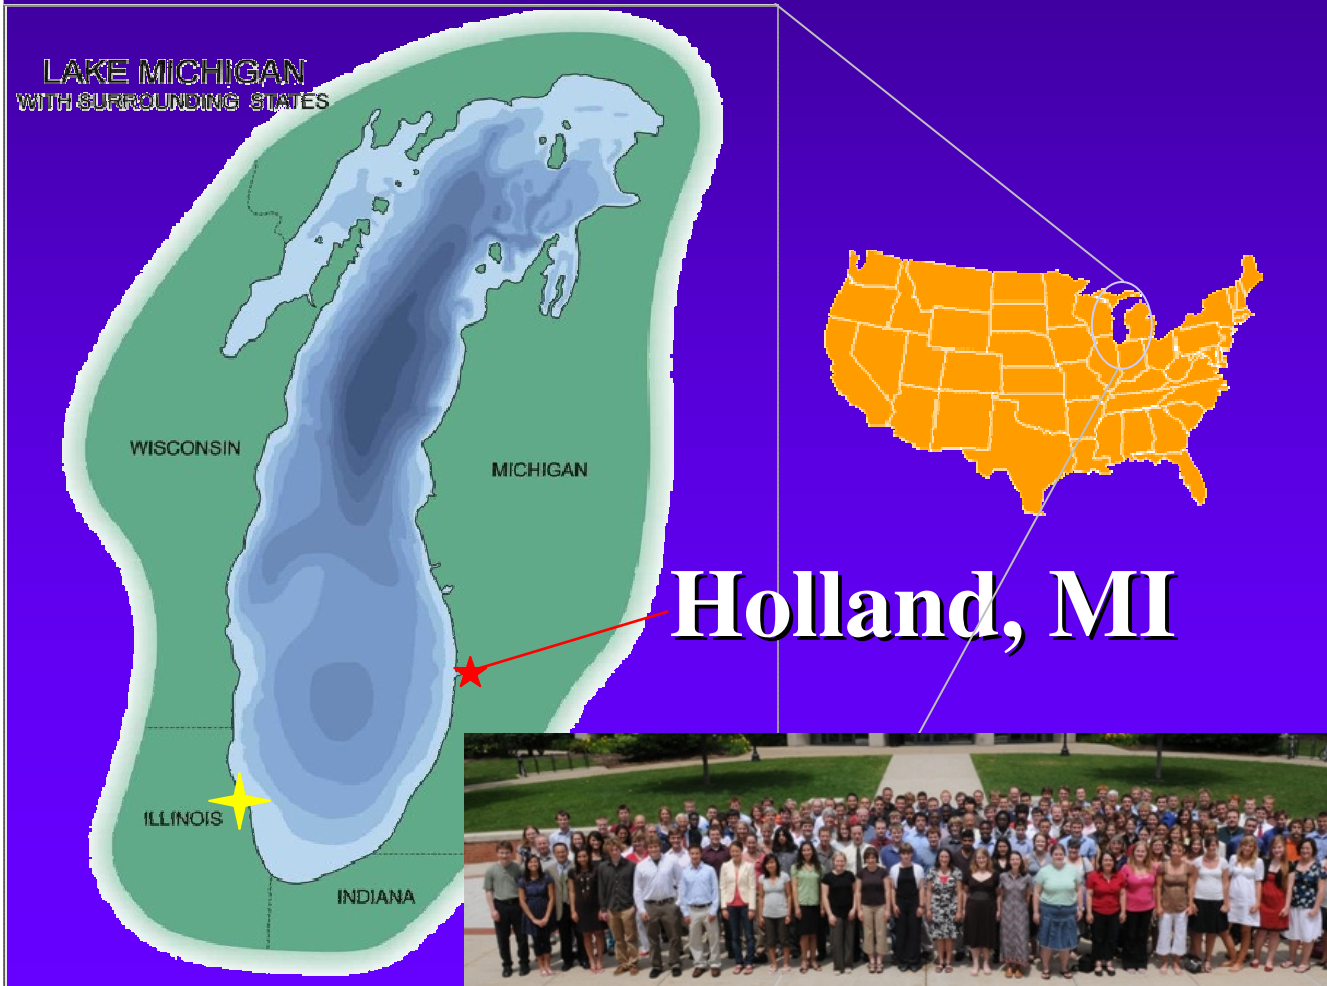

Lectures (and labs)

- **New instrumentation and connectivity allow new collaborative approaches**
- **Interdisciplinary and non-proliferative**

Where is Hope?

~3200 undergraduates

The Hope College Nuclear Group

- The integration of research and education
- Publication-driven, NSF funded
- An interdisciplinary expansion

Our Research Model (#1)

- **Heavy Ion Reactions**

Radioactive Nuclear Beams

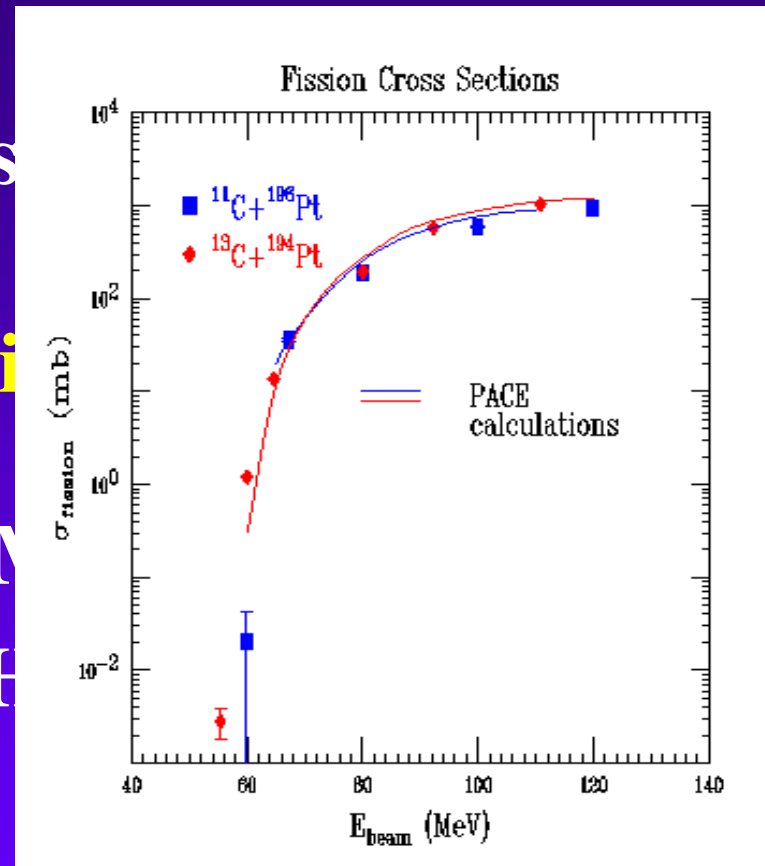

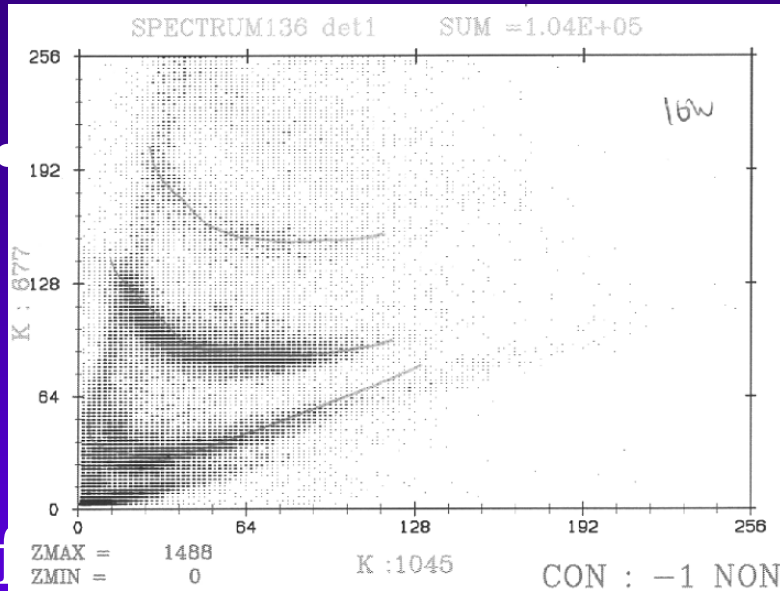

- **Off-site experiments at MSU & Notre Dame**
- **Equipment building at Hope**
- **Data analysis at Hope**
- **Small to medium-sized collaborations**
- **Multi-year projects**

Our Research Model (#1)

- **Equipment building at Hope**
- **Data analysis at Hope**
- **Small to medium-sized collaborations**
- **Multi-year projects**

Our Research Model (#1)

- **O**
- **E**quipment building at Hope
- **D**ata analysis at Hope
- **S**mall to medium-sized collaborations
- **M**ulti-year projects

MoNA

The Modular Neutron Array

[Phys. Rev. Lett. 100, 152502 \(2008\)](#)

[Nucl. Phys. A801 101 \(2008\)](#)

[Phys. Rev. Lett. 99, 112501 \(2007\)](#)

[Symmetry Vol. 4 Issue 6 Aug. 2007](#)

["Undergraduates as Researchers", The Chronicle Review, Vol. 53, Issue 33, \(April 20, 2007\).](#)

Our Research Model (#2)

- **Ion Beam Analysis**

PIXE, RBS, PESA, IBIL...

- **On-site experiments (HIBAL)**
- **Sample preparation at Hope**
- **Data analysis at Hope**
- **Small collaborations**
- **Single and multi-year projects**
- **Very interdisciplinary**

Ion Beam Analysis Techniques:

Particle Induced X-Ray Emission (PIXE)

Rutherford Backscattering (RBS)

Proton Elastic Scattering Analysis (PESA)

Ion Beam Induced Luminescence (IBIL)

Hope College Ion Beam Analysis Lab

“Standard” Alphatross Ion Source

H⁺ or He⁺ available

**Rb charge exchange:
H⁻ or He⁻**

Pelletron Tank: +1.7MV

N₂ stripping gas

Extra lead shielding option... <2mR/hr

HE Focusing & Analyzing

Full energy:

3.4 MeV H⁺

5.1 MeV He²⁺

Endstations & Microprobe

5-axis goniometer, CCD camera, sample vacuum interlock, separate control console

Control Consoles

Linux
AccelNET

Windows
RC43

Windows
CAMAC/
FPGA
DAQ
control

**Trace Metal Analysis
of Sediment...**

Metals via ICP

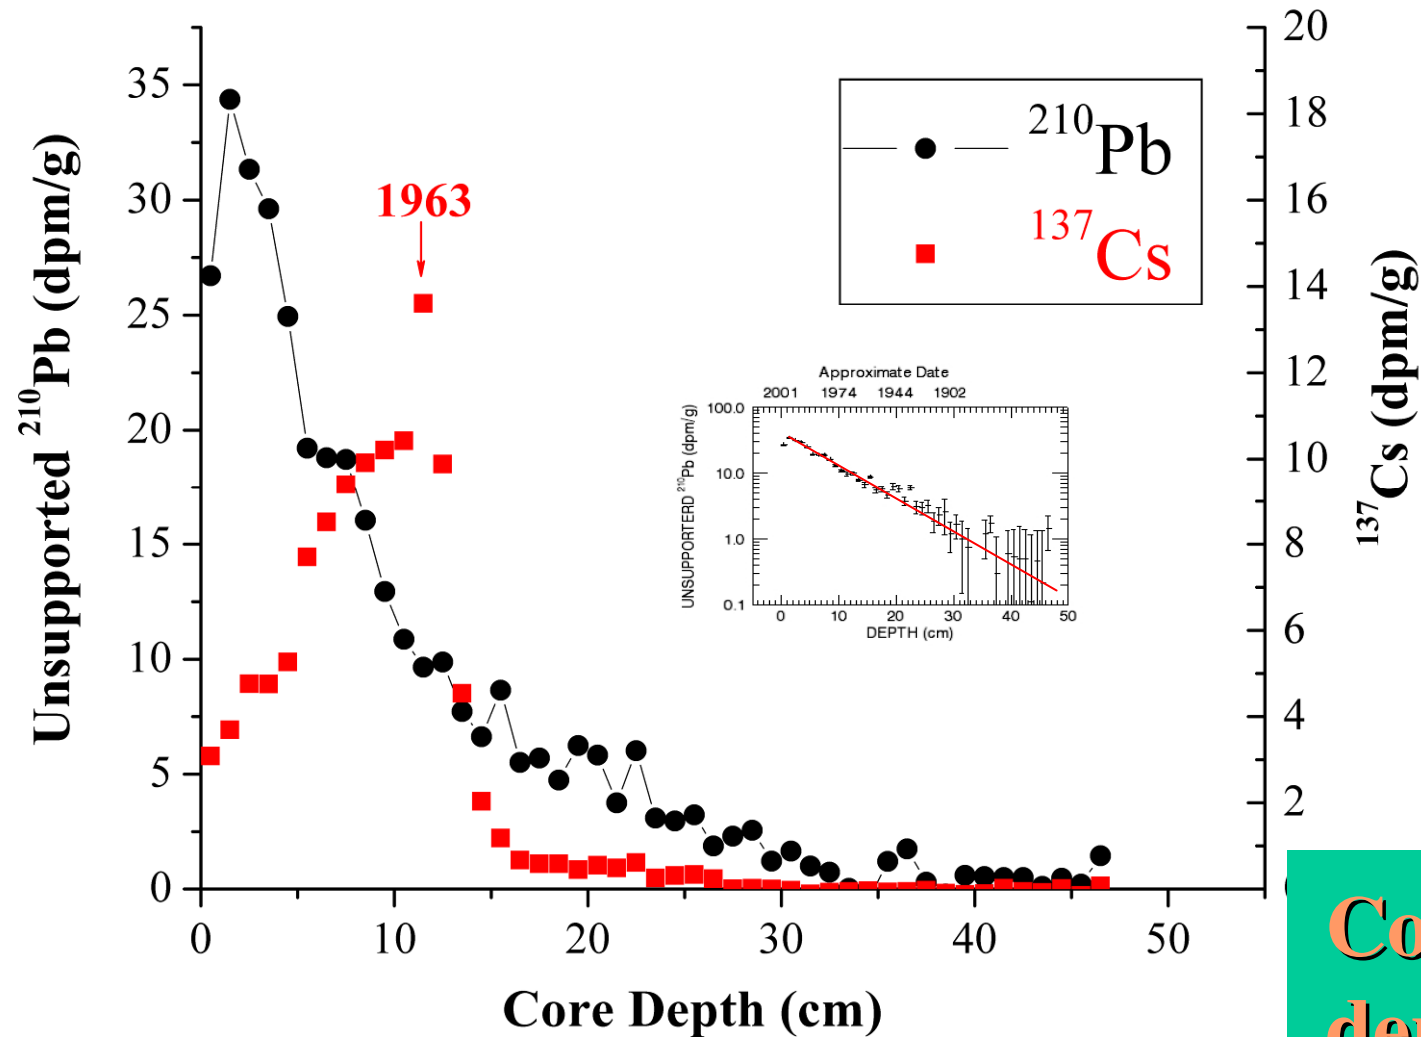

Metals via PIXE

Sample prep:

- 1. dry sediment**
- 2. press into self-supporting target**

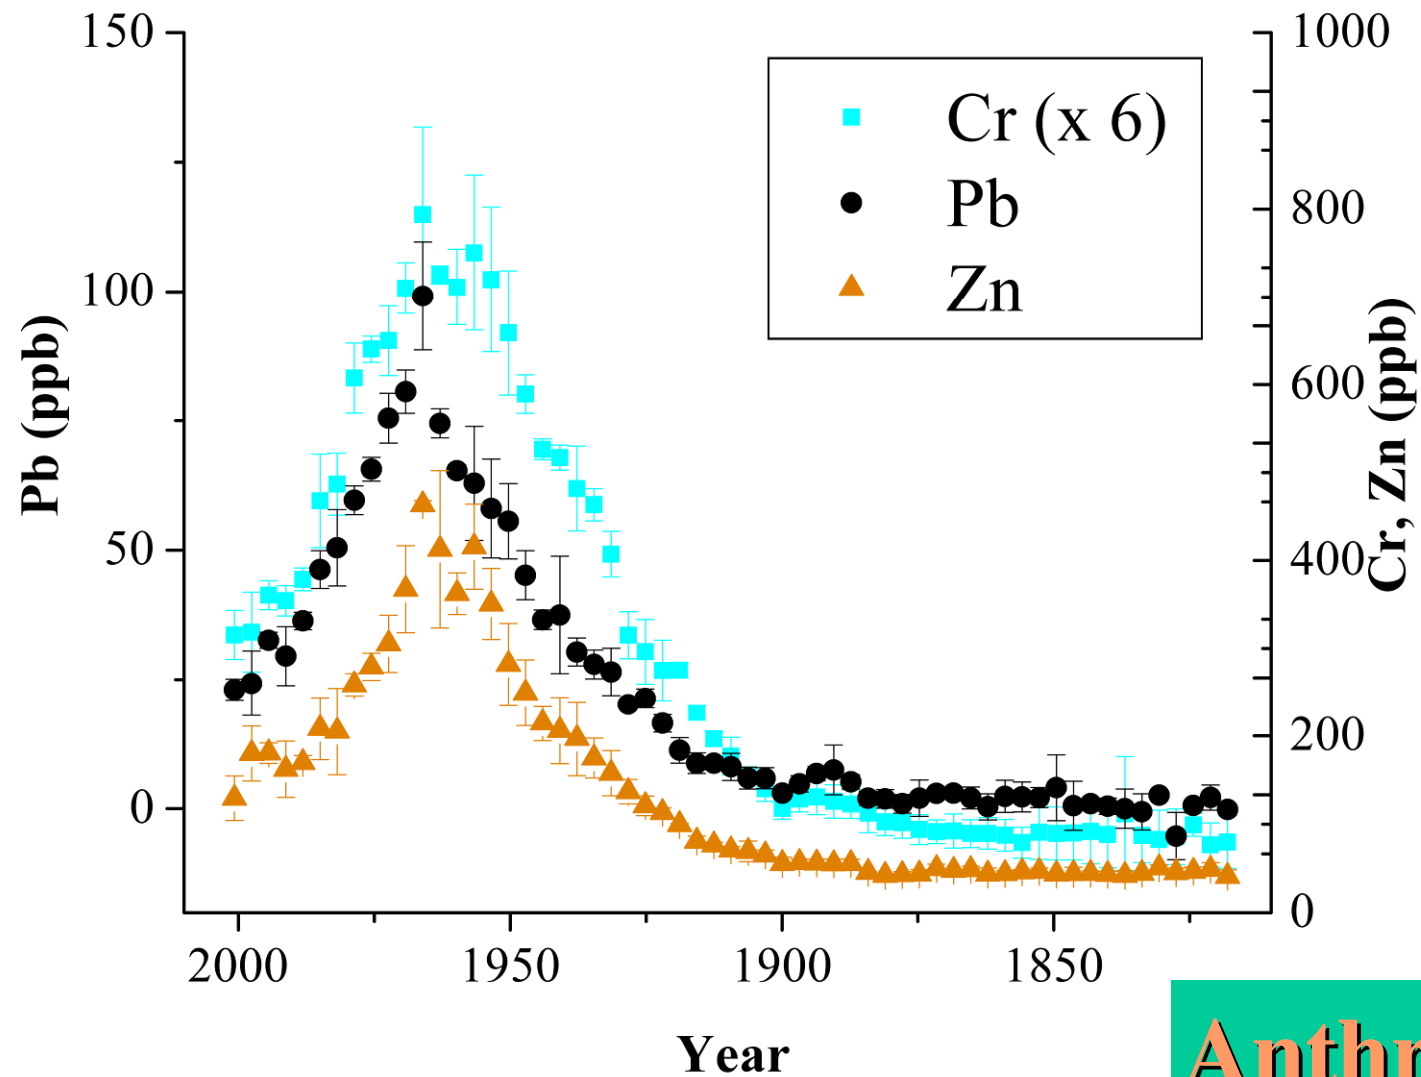

Radiodating Lake Cores

Convert core depth to year

Sediment Chemistry

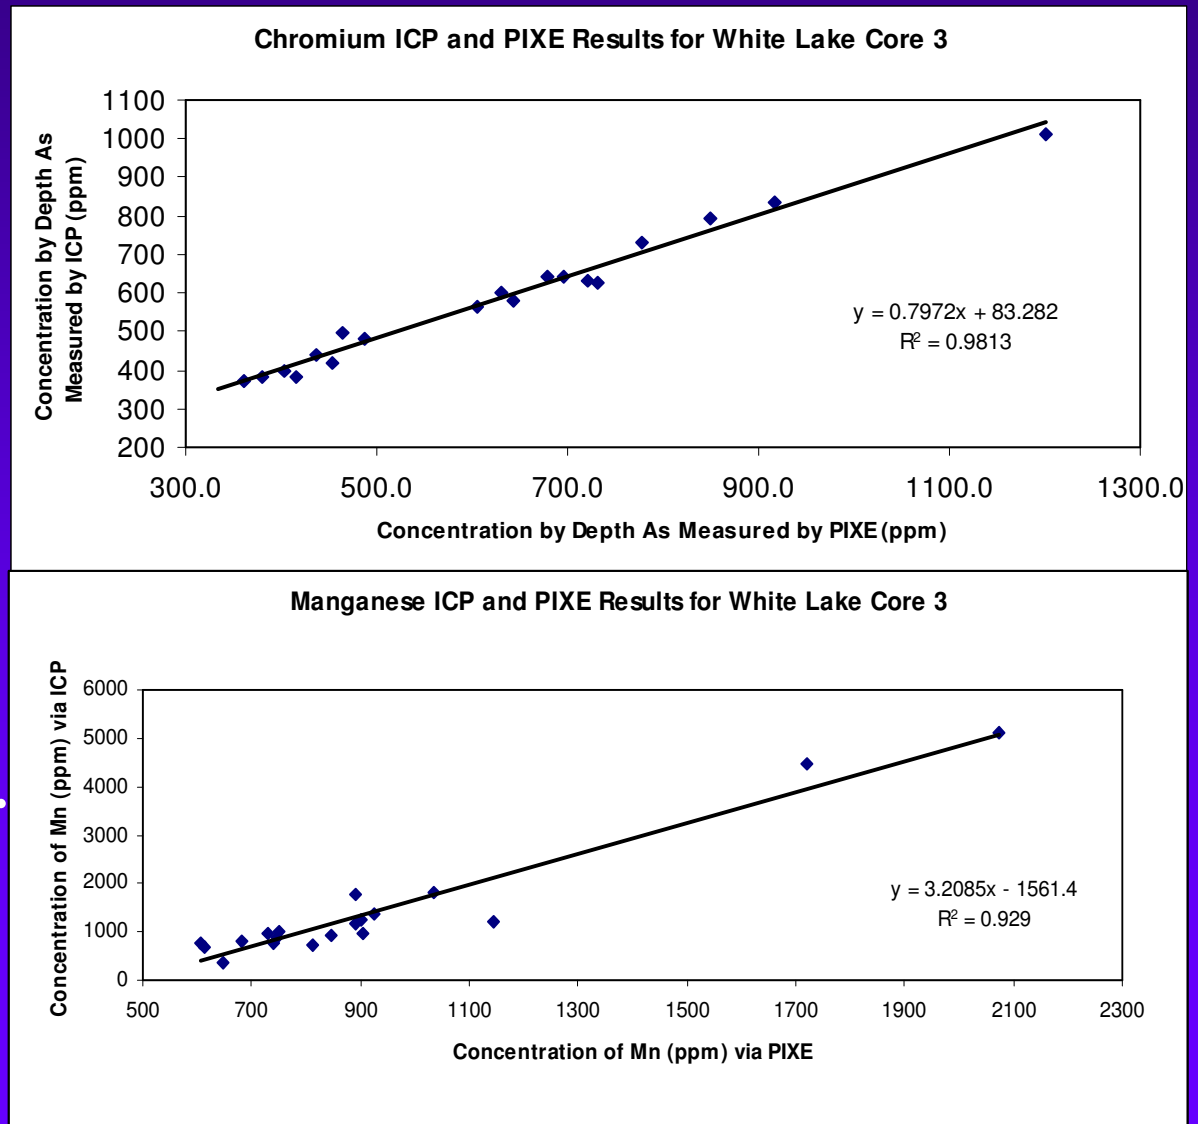

Anthropogenic

ICP vs. PIXE

• White Lake Sediment Core

- Quantitative, reproducible, non-destructive
- Faster by a factor of ~3!

J. M. Lunderberg et al.
NIM B266 (2008)
4782-4787

Gel Thickness Determination

Proton Elastic Scattering Analysis (PESA)

- ΔE is directly proportional to Δx
- SIMNRA allows us to relate energy loss to atoms/cm²

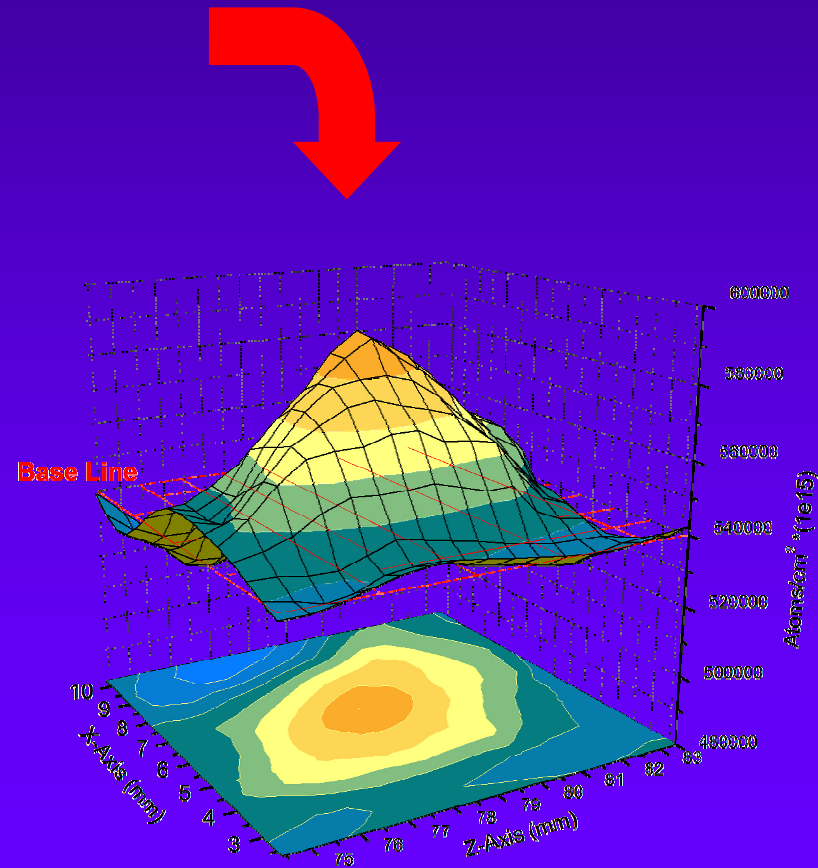

J.Warner, L.Ellsworth, M.Rycenga, L.Kiessel

Myoglobin

PESA Analysis

SIMNRA Analysis

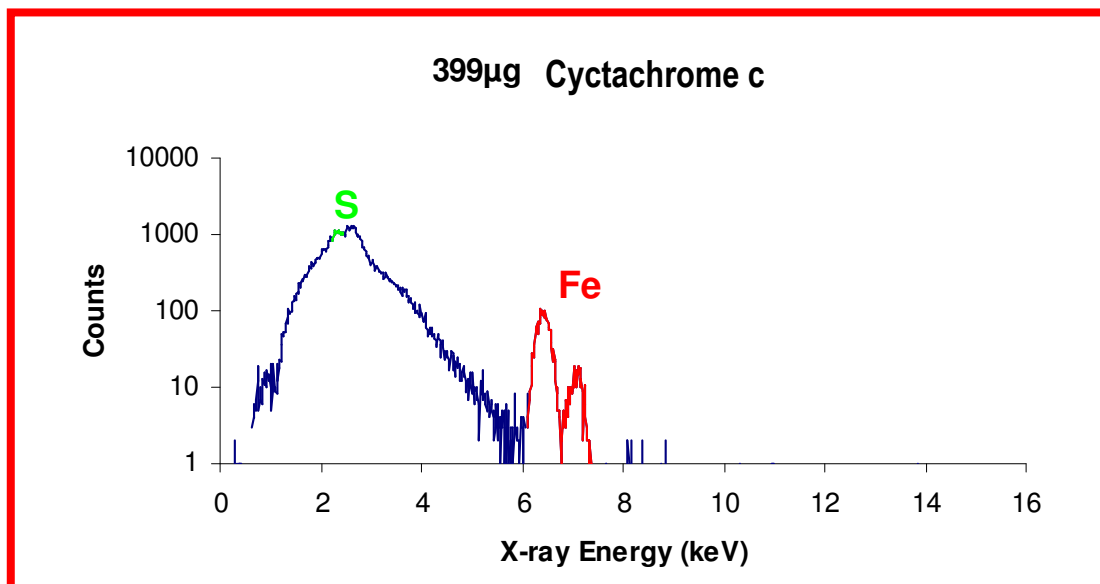

SIMNRA by Matej Mayer

<http://www.rzg.mpg.de/~mam/index.html>

PIXE Analysis

*J. D. Warner et al.
NIM B (2009)
submitted*

CL System for Forensic Geology

26 mm ~ 1"

Soil Analysis

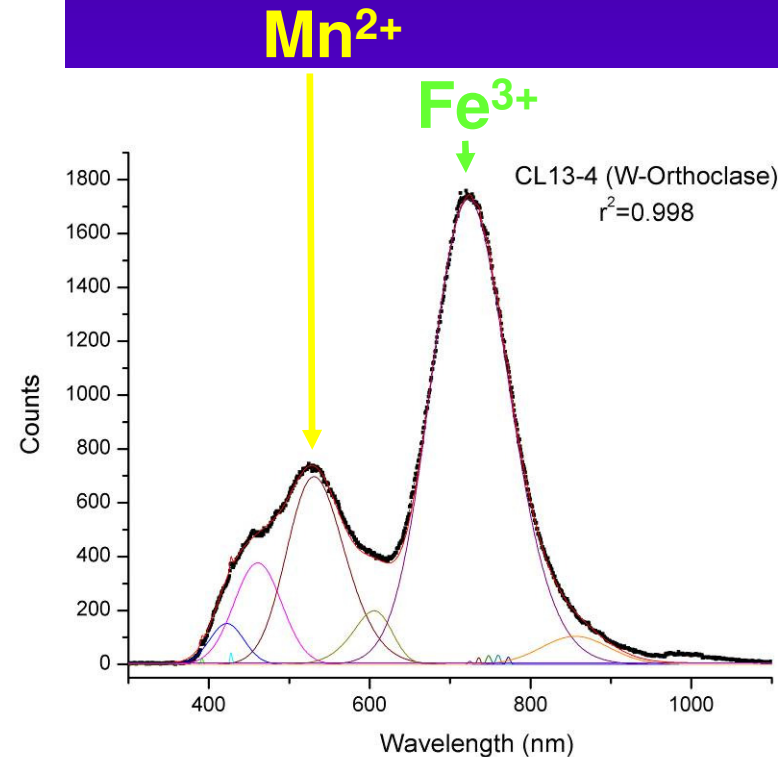

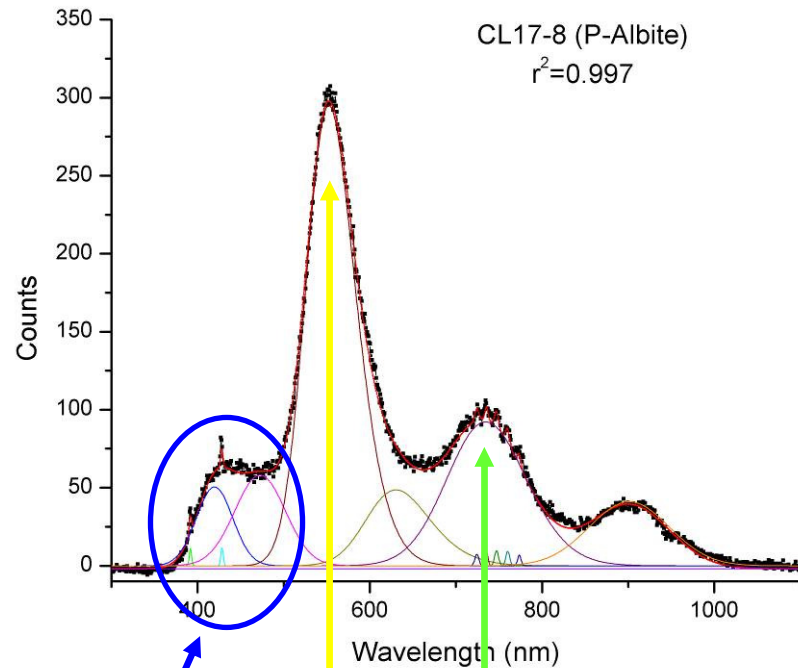

Ion Beam Induced Luminescence

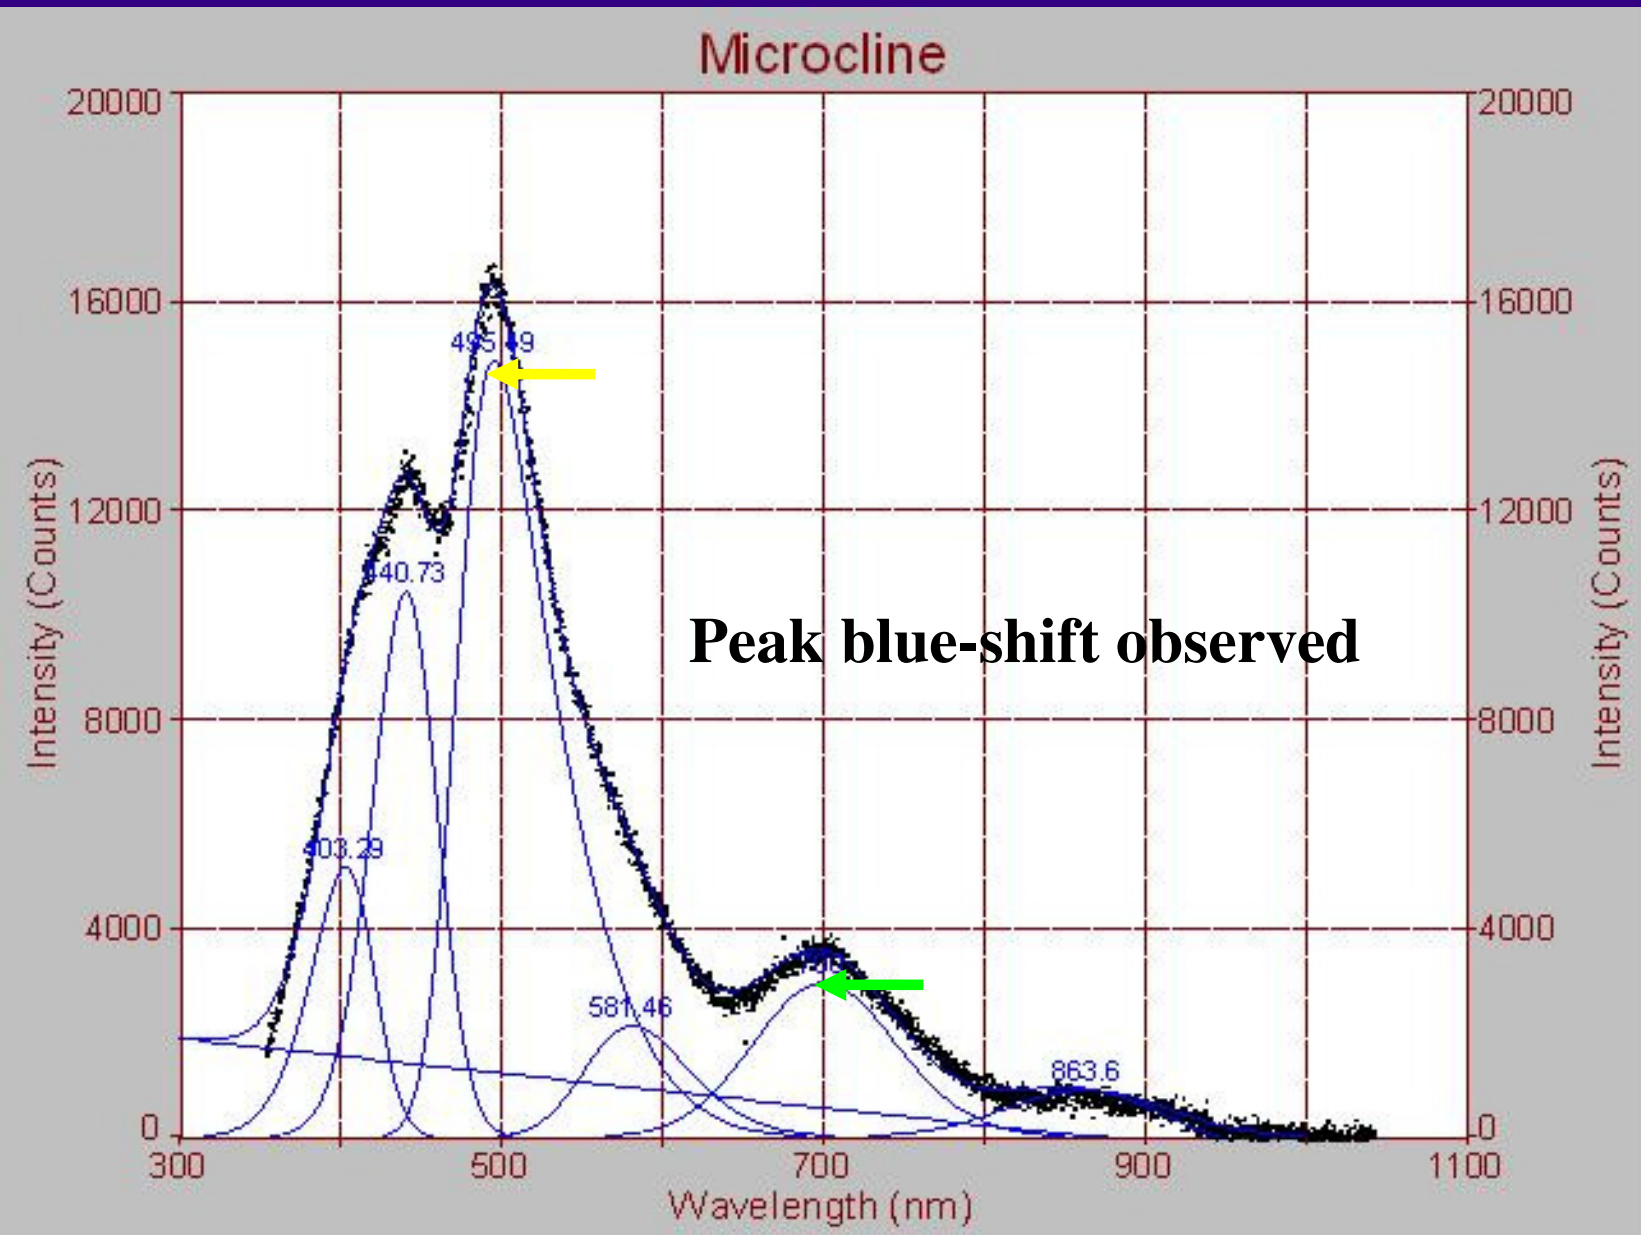

Another Example: Feldspars

CL peaks of known origin, mostly...

Similar Spectra: Feldspar IBIL

Conclusions

- **It is not only possible to integrate research and education – it attracts students**
- **New instrumentation and connectivity allow new collaborative approaches**
- **Undergraduates can contribute**
- **Interdisciplinary and non-proliferative**
